We're building a younger, more modern fleet

Experience the future of travel as we upgrade our fleet with hundreds of new planes to bring you a more modern, comfortable and connected experience. On average, we're taking delivery of one new plane a week, so [book a flight](#) now on our Boeing 777-300ER, Airbus A321 Transcontinental or Airbus A319 to see how we're changing the way you fly.

We're excited to announce that we are also refreshing our existing aircraft, with our Boeing 767-300 and Boeing 777-200 retrofit programs beginning in 2014. Our 767-300 updates are currently underway offering you enhanced features including 28 new fully lie-flat Business Class seats with all aisle access as well as 25 Main Cabin Extra seats.

As we transform our fleet, we're working to enhance your experience throughout your travel journey.

New planes. Inside and out.

As part of the largest aircraft order in history, we're taking delivery of an average of one new plane a week, and refreshing our existing fleet to bring you a more modern, comfortable and connected experience.

Planes for long-distance flights
